

Are you on twitter ?

Exploring twitter ego-networks

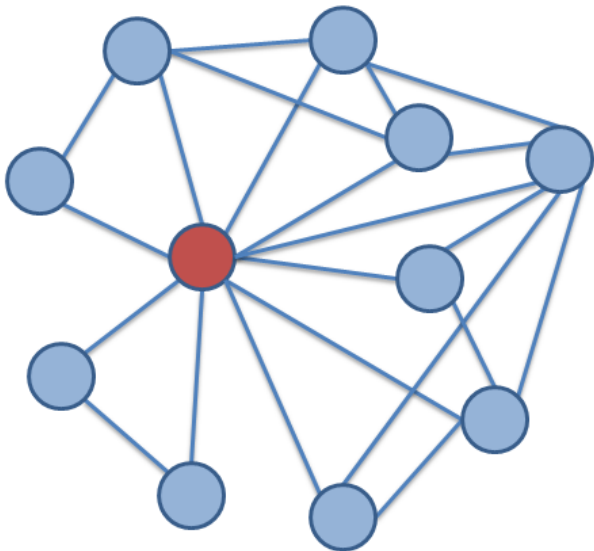

Natalia Bielczyk, Moritz Boos,
Daniel Borek, Olgierd Borowiecki,
Mykola Melnyk

Two days is not enough for ...

- Data Mining
- Network Modelling
- Community Detection
- Observations and Analysis

- Learning version control & setup of the environment
(*Python* with *Tweepy*, *R* with *rtweet*)
- Getting access to Twittet developer account
- scrapping the twitter with *twitterscraper*

Twitter followers as directed ego-networks

What we still want to do

- Community detection using hashtag for #reproducibility and #replicationcrisis
- Within & outside Community Flow
- Generators and propagators identyfications
- Topic-Tweet Profiles

Brainhack is about learning

- Starting the project in different environments is not easy
- Getting data is the most difficult part
- Teamwork matters!
